

Year 10 Summer Project

Giant objects.

Year 10 summer project

Claes Oldenburg is a Swedish sculptor who makes large replicas of everyday objects. You may have noticed previous years work around the Art room. This is the showpiece of the course and Art at Denbigh high always steps up to the mark!

You may choose to replicate any everyday object.

A toothbrush. a Hamburger, tennis racket, a watch ,a drinks can
The list is endless.....

To begin research Claes Oldenburg to get some ideas..

(Keep an eye out for a large existing object which you can transform.)

Good luck and we look forward to seeing you after the summer holidays with your creations **(please remember this is part of your coursework)**
