

Nibble, Add Back Tessellation

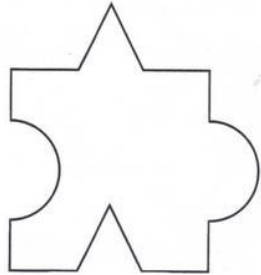

If you have a shape that will already tessellate, then you can make a new tessellating shape (which will tessellate by translation) simply by “nibbling” a piece off one side and adding it back on the other.

- 1** a Start with a square. b Nibble a semi-circle off one side. c And add it back on the other side.

This shape will now tessellate.

So will this.

- 2** Use this method to make some tessellation shapes of your own. Draw them below.
